
BEYOND NORMS: Thank you for your interest in supporting the workshop

From Antonella Nonnis <a.nonnis@lcc.arts.ac.uk>

Date Thu 1/15/2026 11:01 AM

Dear [REDACTED]

Thank you so much for getting in touch and for your interest in supporting the "BEYOND NEUROTYPICAL NORMS: *Towards Intersectional Inclusion at LCC*" workshop. I really appreciate it.

If you'd be interested in attending and/or helping on the day, there will be several **light, supportive facilitation roles**, such as:

- helping with **room set-up**
- **note-taking** or light **field observations**
- preparing and supporting with **Mentimeter** activities (just some questions where students can reply to)
- helping maintain or prompt contributions on **Padlet**
- helping to **revisit and/or run some of the activities** scheduled for the session
- generally supporting the flow of the workshop and helping it feel welcoming and inclusive

If you'd like, I can also **share the workshop activities document** with you in advance so you can see what's planned and decide what you might feel most comfortable helping with.

I'd also (and mainly 😊) love to hear **what you had in mind** when you registered your interest in helping, if there's something in particular you were hoping to support with. Please let me know.

There's absolutely **no expectation to do everything or anything at all**, and we'll make sure any roles feel manageable and aligned with your interests.

I'll be in touch closer to the date with more details, and we can also have a short check-in beforehand, if you wish to do so, but please do not hesitate to get back to me.

Thanks again for your generosity and support; it really means a lot :)

All the very best,

A

Please note that I work part-time, so there may be a delay in my email response. Additionally, I might send emails at odd times, so please do not feel obliged to respond to this email outside of your usual working hours.

25/26 Y1 & Y2 Lecturer BA UXD

Block 1 I teach Y1 *Design Thinking*: Visually Communicating Complexity on **Thursday mornings** (T405) and Y2 *Digital Products*: Prototype & Realisation on **Fridays** (T405). I do mostly **PGCert** on **Wednesdays** and work remotely on **Thursday afternoons**.
